

# PANDO MOTO

2020 COLLECTION

PANDO  
MOTO

*Mass manufacturing works for some industries.  
Motorcycle gear is not one of them.*

# ABOUT US

Mass production works for some industries. Motorcycle gear is not among them. Pando Moto was born in the minds of passionate motorcyclists who could not find a balance between looking good and feeling safe. Therefore, we made that possible.

Since 2011, Pando Moto has evolved into a premium motorcycle-clothing brand, fusing European design and engineering with smart, safe technology. Our high-performance protective gear for motorcycles does the hard work, so you can focus on what matters.

We employ innovative, state-of-the-art textile technologies, along with a cut-to-the-bone design® philosophy to provide unparalleled protection no matter the terrain. You do not have to choose between safety and style. Pando Moto unapologetically delivers both.

# DESIGN PHILOSOPHY

In layman's terms: nothing less, nothing more. No bells or whistles. No frills. We believe that simplicity is sophistication; The philosophy we have at heart of everything we do. The safety features of our apparel are weaved into the very fabric of our creations, intelligently concealed with forward-thinking designs.

We are eight years strong, but never stop working to up our game. Our goal is to produce ergonomic, good-looking, pre-shaped clothing items capable of withstanding unimaginable pressure.

# TECHNOLOGY

## CE CERTIFIED PRODUCTS

There are days when things can get nasty. Only during these times, you start appreciating the reliability of your motorcycle gear. After five long years of waiting the European Union finally has approved a new standard prEN 17092: 2018 “Protective Clothing For Motorcyclists”. PANDO MOTO is among a few that have fully CE approved collection, meaning that every model had passed seven required tests.

### ABRASION RESISTANCE TEST

Darmstadt method. This test simulates the stress that is placed on the protective garments when worn by an average rider, when sliding from variable initial speeds to standstill on a real concrete road surface. To pass, no holes with an opening of 5mm or more in any direction are allowed on the layer closest to the body.

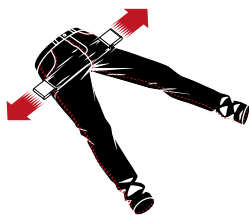

### IMPACT ABSORPTION TEST

Elbow, shoulder, knee and hip impact protectors are to be present in Class AAA and AA garments as a mandatory requirement, with the hip protectors being optional in Class A garments. Class B garments are designed to provide the equivalent abrasion protection but without the inclusion of impact protectors.

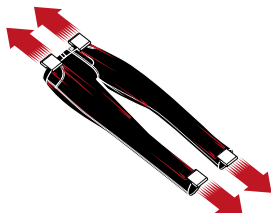

### SEAM STRENGTH TEST

Three test pieces of each seam, including all layers of materials from the garment that are present in the seam are tested. The seam strength is calculated by dividing the breaking force by the length of the tested seam.

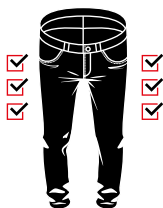

### TEAR STRENGTH TEST

Six ‘trouser leg’ type specimens are taken from each material of the garment and are torn apart using a standard tensile test machine. Materials shall be tested in two directions - warp and weft.

### OTHER REQUIRED TESTS

Dimensional stability test – passed  
Fit and ergonomics – passed  
Garment restraint – passed

# ONE OUT OF TWO

B level	A level	AA level	AAA level
		120 km/h - AAA level	
		70 km/h - AA level	
		45 km/h - A level	
		45 km/h - B level	

*Our products are made of certified materials and officially CE approved (prEN 17092) having AA or A level of protection.*

# ADVANCED FABRICS

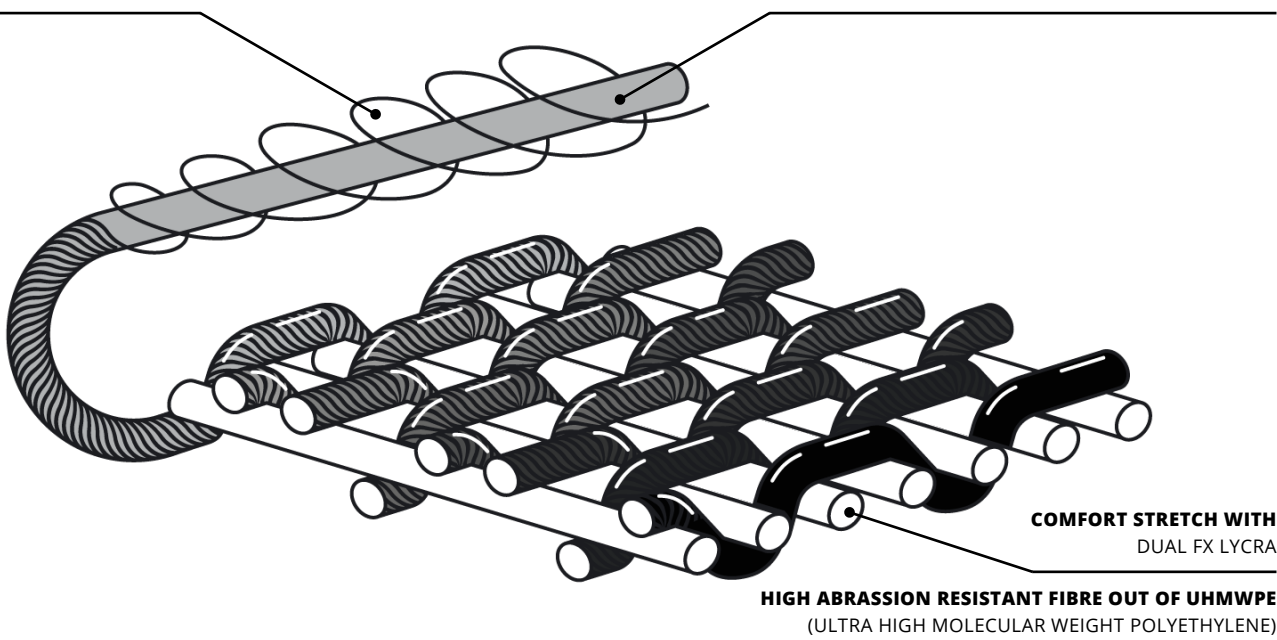

## SINGLE LAYERS

- DYNEEMA® - 15 times stronger than steel though looks like regular denim.
- ARMALITH® - world's strongest denim.
- CORDURA® - extra durable nylon mixed with cotton to give extra strength and regular look.
- COOLMAX® - effectively evaporates heat and sweat.

## ARMALITH

WRAPPED WITH COLORED COTTON YARN

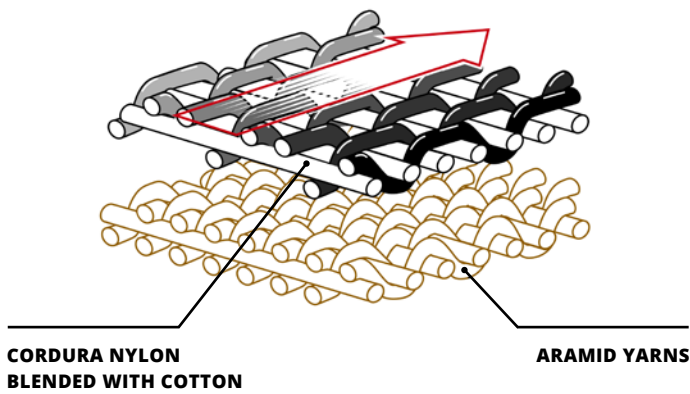

HIGH ABRASSION RESISTANT FIBRE OUT OF UHMWPE  
(ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE)

## DOUBLE LAYERS

- Sandwich of DuPont™ Kevlar® - used in military to stop bullets and CORDURA® - extra durable nylon mixed with cotton to give extra strength and regular look.
- COOLMAX® - effectively evaporates heat and sweat

## CORDURA / KEVLAR

# HAND-MADE CARE

Our entire product range has been designed to fray and abrade during wearing. Most of them are pre-washed according to special PANDO MOTO recipes. This is a hand-made process. Thus, every piece is unique. Some parts of aging textures are done with laser to reduce environmental impact when it comes to water, energy, and chemicals.

MERAMY-POL-01

- Base layer long sleeve shirt.
- Made of 100% polyester with odor control.
- Quick to dry, moves sweat away from the body.
- Maintains exceptional temperature management with minimal bulk.
- Dual thread: less filament and hexagonal surface for maximum moisture management.
- Flatlock seams construction designed to eliminate chafing.
- 4-way stretchable fabric for maximum freedom of movement.
- Longer back for proper coverage.
- This is a collaboration project with Thermowave (thermowave.com).
- Made in Europe.

# ARMOR

PLANET KNOX

- MICRO-LOCK uses SMART technology and properties to keep the armor super soft to touch but it locks when impacted.
- The locking action increases the amount of impact absorbed by the protector and reduces the energy passed through to your body.
- CE approved (EN1621-1:2012).
- Perfectly adapted and barely noticeable.
- Comes in woven bag.

**KNOX BACK | 45€**

## ARTICLES

### RideApart

"Buy these jeans, y'all. They look fantastic, they fit well (sizing is accurate), and I can personally attest that they will literally save your skin in a crash. Yes, they are pricey, but such is the reality of good gear. You get what you pay for, as they say. And in these Pando Moto Boss 105 jeans you get a hell of a lot."

## CYCLE WORLD

"Has Pando Moto made the best riding jeans ever? At this point in our riding careers the answer is yes. Riding pants that fit well and hold up to miles of abuse in all kinds of weather are hard to find. Don't worry about ordering sight unseen in the e-commerce age; we both chose sizes based on our most comfortable non-riding jeans and are pleased with the fit."

"Pando Moto have caused a stir on the Shed shop floor with their stunning M65 protective jacket made from Jacquard Dyneema canvas that provides protection that's stronger than steel and water repellent."

### BIKEEXIF

"Camo isn't usually my deal, but it's subtle enough here that I actually like the aesthetic. And while the jacket isn't overly heavy, it does have a great, robust feel to it. It's really well made too, with some really slick details in the mix. The collar and cuffs are lined with a plush, corduroy-like fabric, and both the collar closure and velcro cuff adjusters are made from really heavy duty nylon."

### CRUISER

"I had a little crash while wearing this jacket, and though I hit the guardrail on the highway going about 30, I think I hit the ground closer to 15 mph. I slid on my butt for a moment, went back and hit my shoulder, rolled on my back, then popped up. My pants had a good shred spot through the butt, but this jacket looked no different. The impacted fabric is tough as nails and looked identical to the spots around it that never touched the ground."

"Pando Moto's military style M65 denim jacket seemed to check off all the boxes that usually left me feeling wanting so I decided to give it a go. After receiving the M65 in the mail and throwing it on for a quick ride around the city during an evening peak hour session I have to say I was a little impressed."

### THE DRIVE

I wore the Karl Devils for four days straight, slept in them on planes (and once, briefly, in a Colorado Springs motel bed), and rode hundreds of miles in them on two very different motorcycles, and they were like a second skin; I never noticed them except to note how comfortable and breathable they are.

"My Pando Moto Karl Indigo jeans smell like the inside of a garbage can at this point. That's because I've been wearing them for almost 4 months straight and they've never been washed. I wear them to the market, I wear them on the couch, I wear them in the car, I wear them at the cafe and, well, wear them everywhere. Especially on my motorcycle. My fiance gets especially annoyed when I wear them at home because she cannot believe they are just as comfortable as my super-hero lounge sweats."

## WHAT IS PANDO ACE?

Pando Ace is a global, invite only pro-staff community of bikers and enthusiasts who like to look good, and are passionate about the newest technologies in Motorcycling and who just love sharing their stories and tips and tricks with others. We commit to sharing everything we make with the Pando Ace community in return for their invaluable feedback, and their passion in sharing their expertise and enthusiasm for our state-of-the-art apparel.

## WHY DO WE NEED ACES?

As a Pando Moto Ace, you will be representing our brand and helping to spread the word about our innovative, state-of-the-art textile technologies. More importantly, we want you to be engaged and involved within the motorcycle community guiding others who does not know about this game-changing innovation, and making sure, they know that they do not have to choose between looking good and feeling safe. This is where our Pando Ace comes to the rescue.
